## Westerdale Council

At a meeting of the Westerdale Municipal Council which was held on Saturday afternoon it was decided on account of the hail damage to curtail all road construction for this season, and only necessary maintenance to the roads will be done.

A committee was appointed to provide work in the way of graveling roads and other projects for men who had received relief from the municipality.

The council decided that a list of lands be made up to conduct a tax sale and the list be sent to the Department of Municipal Affairs for approval.

The councillors for each division were asked to make a survey and report as to where the collections could be made to cover the seed grain advanced.

A deputation was received from the Didsbury Cemetery Board asking the council to co operate in graveling the road to the cemetery. The proposal put forward that Westerdale, Mountain View and the Town of Didsbury each contribute one third to the cost. The council expressed themselves favorable to the project and a committee was appointed to meet with the other municipalities interested.

Routine matters and the passing of bills comprised the balance of business transacted.

## J. V. Berscht Will Open at Innisfail

Mr. and Mrs. Russell Berscht left on Monday for Innisfail to make arrangements for the opening of a J. V. Berscht Store at that point.

They have bought a stock of goods at Innisfail which will be augmented by another stock bought at Trochu. It is expected that the store will be open for business in about a week.

## Several Organizations Honor Mrs. Lowrie

Mrs. J. H. Lowrie, who moved with her family to Calgary last week end, was the guest of honor at several social events during the past two weeks.

On Friday, August 7, Mrs. Lowrie was entertained by the Canadian Legion when about 50 members and friends attended. She was presented with an inscribed flower vase in gratitude for the many services she had rendered to the Legion.

On Tuesday, August 11, the local chapter of the Eastern Star entertained in her honor at the home of Mrs. C. Wrightson, worthy matron, at Innisfail. A large number of local members and some members of the Innisfail Chapter attended. A presentation of a set of "Crown Derby" plates was made. Mrs. Lowrie was a past matron of the chapter.

On Wednesday evening she was entertained at the home of Mrs. A. R. Kendrick, by Mons Chapter of the I O D E., of which she was regent. Mrs. J. A. McGhee, vice regent, presented her with a set of "Crown Derby" cups and saucers on behalf of the chapter and thanked her for the splendid work she had done for the chapter during her long membership.

During her many years of residence in Didsbury, Mrs. Lowrie has been very active in church affairs and the various ladies organizations and she will be greatly missed in the community.

## Evangelical Church Notes.

If you are staying home with those who are too poor to take a vacation, come to church. If you are able to have a vacation, take it, but do not forget that helping the church anywhere helps it everywhere.

Remember that the church is the oldest corporation with a soul, and the biggest business for live laymen.

## Dividend May Start Oct. 3, Says Premier

October 3 was indicated as a possible date upon which social credit dividends might first be forthcoming, in a speech delivered before an audience at Brooks on Monday evening by Premier Aberhart.

Possibly the date would actually be set further on than this, he stated. The first dividend would probably amount to \$5.00 or \$10.00, depending on current production statistics. "Prosperity certificates" would not be used for dividend purposes. They were to be confined to payment for work programs and other necessary expenditures of the kind," he said.

Mr. Aberhart referred to establishment of a new canning factory in Brooks, and expressed the hope that other industries would be added to the province at the rate of one a week.

## Golf Notes.

In the golf fall one club competition just completed, Bert Fisher and Jim McGhee are tied with a net score of 35 for 9 holes. Playoff will be arranged later.

The net scores are:

Jim McGhee	35
Bert Fisher	35
George McKenzie Grieves	40
George Julien	41
Tom Johnson	43
Jim Kirby	45
Ed. Ranton	46
Jack Fleury	47
Ed. Watkin	47
H. J. Friesen	49
Clint. Reiber	50
A. Brusso	50

The Trophy competition will start soon.

## Another Hail Storm.

A third hail storm visited Didsbury district and did considerable damage to a strip south of town. The storm did damage from Melvin to several miles east of town, on Monday evening.

## BIRTHS

at Didsbury General Hospital

August 15, to Mr. and Mrs. Wm. Coates, a daughter.

August 17, to Mr. and Mrs. Mose Loewen, a son.

## New Wheat Delivered at Elevator.

The first new wheat of the season was delivered to the Bawlf Elevator on Thursday last by the A. C. Neufeld Estate, 12 miles south-east of town. The wheat, which had been hauled was a fair sample weighing 57 lbs. to the bushel and grading No. 3 northern. The yield, however, was only 3 bushels to the acre, but it is estimated if the field had not been hauled it would have possibly run as high as 20 bushels per acre.

The farmers of the district are trying various methods to salvage what wheat they can from their hauled crops in an effort to obtain seed for next year's operations and saving all they can to avert a possible feed shortage.

## Express Appreciation.

Editor, Didsbury Pioneer:

We (the Ghost Pine Softball Team) regret that owing to car trouble that part of their team were delayed on Thursday August 11.

Will you please express our appreciation to the umpire and all those responsible for waiting for the balance of our team to arrive before calling the first game.

Yours truly,  
Ghost Pine Athletic Association,  
N. King, secretary.

## Obituary.

### HOLINQUIST

Edward Holinquist passed away on Saturday, August 15 at Didsbury Hospital after a lengthy illness, at the age of 47 years.

He was one of the earlier settlers of the district, coming here with his parents 34 years ago and had resided on the farm west of town since that time. He is survived by one brother, Gilbert, with whom he resided.

The funeral service was held at Westcott United Church on Monday and the interment took place at Westcott Cemetery, Rev. J. R. Geeson conducting the services.

The Dominion bureau of statistics have issued complete figures for the nation's carry-over at the end of the crop year, July 31, placing it at 108,747,059 bushels, a decline of 94,525,957 since the end of the 1934-35 crop year and the lightest figure in seven years.

## 50th Anniversary Surprise.

On the evening of August 11th, the anniversary of the fiftieth year of the married life of Rev. and Mrs. F. S. Spies, the members and adherents of Zion Evangelical Church gathered in the church parlors. Rev. and Mrs. Spies were then escorted thither and a program of singing, speeches, readings and musical numbers was rendered.

Rev. Caughell, the Pastor, said that to have lived together for fifty years and to have shared each other's sorrows, joys and hopes, is to have enjoyed one of the greatest gifts this life has to offer. He stated that even as they had looked forward to life fifty years ago, so even now as Christians they still look forward to life, and life not in a cottage but in a mansion, to which they already have the key, even their faith.

Mr. D. Dippel and Mr. M. B. Clemens, two persons who have already celebrated their golden weddings, were present and were called upon for speeches. Mr. and Mrs. C. F. Rennie, who recently celebrated their golden wedding, were also present.

There were other good speeches and readings and some very excellent musical numbers. At the close of the program Mr. Clemens presented Rev. and Mrs. Spies with a gift in remembrance of the occasion on behalf of the congregation.

The Ladies of the Church had prepared a splendid repast which was served in the basement.

Although Rev. and Mrs. Spies have been members of the Didsbury congregation for only six years, they have found many warm friends. Rev. Mr. Spies has been a member of the Evangelical Church for over 67 years and has preached the Gospel message for about 55 years, eight years on a regular charge and since then by substituting and assisting in various places and churches.

Rev. and Mrs. Spies were married August 11th, 1886, at the home of the eldest sister of Mrs. Spies, Mr. and Mrs. Louis Eidt, in the township of Holland, Grey County, Ont. This date was also the silver anniversary of Mr. and Mrs. Eidt. The ceremony for Rev. and Mrs. Spies was performed by Rev. D. H. Brand. Rev. C. S. Finkbeiner is one of the few surviving adult guests of this wedding.

## The Basic National Problem

Much food for thought is contained in a series of interviews with leading citizens scattered across the Dominion on the subject of the five major national problems which Canada faces and must solve if recovery from depression conditions is to be placed on a firm foundation and made permanent, published by the Financial Post during the spring months and later reproduced in booklet form.

The interviewed comprised leaders of great Canadian industries, public men, heads of public utilities, professors and students of economics, leaders in women's work, prominent journalists, heads of corporations and other well known figures in the national realm, both east and west. They were asked to name what they considered the five major problems facing the country today and their proposed solutions.

A symposium of these interviews reveals a lack of unanimity, not only as to what courses should be pursued to consolidate the gains which have been made in the last 18 months to ensure a continued upward trend of the national economic graph, but even as to what constitute the paramount problems which have to be faced and dealt with.

Among the interviewed over 20 issues were raised as the most important impediments to speedy or even complete recovery but it is interesting to note that nearly one half rated relief and unemployment as the No. 1 problem, with the necessity of developing new markets for Canadian commodities and services both abroad and at home ranking in second place. From that point a wider divergence of opinion as to order of priority is noted on such problems as excessive cost of government, the railway and transportation problem, Canada's international relationships, immigration, public health matters, a renaissance of Christian principles and business and moral ethics and so on.

While the predicament of the agricultural industry and the plight of the farmer is given some attention by a number of the interviewed leaders, including some of the Eastern industrial magnates, it is somewhat disappointing to find that its position as the keystone of the economic arch is not given the recognition that it deserves and it remains for Professor J. E. Lattimer of Macdonald College, P.Q., to give the question its proper relationship to the entire national outlook.

Professor Lattimer lists the five major problems of the country as: 1, National credit; 2, Unbalanced budgets; 3, Transportation; 4, Unemployment and Relief; 5, Agriculture, but not necessarily in that order of importance, for he says in words worthy of repetition:

"Few discussions leave agriculture entirely off the list. Yet so seldom has the position of agriculture in the national economy been discussed in detail that further treatment of this point is warranted. Another reason why agriculture should be treated in some detail is that the problems enumerated are interdependent. The major cause of the persistence of depression and unemployment is the discrepancy which has prevailed for six years between the prices of farm products and the prices of some other goods resulting in the low purchasing power of farmers in general. Hence it is almost correct to say that instead of five major problems there is only one, out of which the four others emerge.

"Depressions do not cause unemployment. It is unemployment which causes depressions. This is bound to occur in an era of specialization. Production by specialists increases volume in the aggregate but necessitates a price relationship allowing goods to be exchanged in such quantities that employment is general.

"When farming is prosperous employment is more regular, relief lists less exacting, trade more brisk, freight volume greater, budgets balanced more easily and the national credit more secure. This is the way that the other four problems emerge from the chief difficulty—the discrepancy in prices."

While few in Western Canada will disagree with the foregoing conclusions as enunciated by the professor of agricultural economics at Macdonald College, Prof. Lattimer steps on more debatable ground when he offers his solution for the problem. He points out there are two alternatives, one, to raise the prices of farm products to the level of other goods and the other, "by reduction of the prices of those goods now on the high level in order to lower the cost of farm products and thus enable these goods to compete in the export market," and forthwith pronounces himself in favor of the latter course.

In thus committing himself the worthy professor is allying himself with the "low price" school of thought, a theory which, whether economically sound or not, is not by any means a popular conception of the solution of this problem and moreover a solution which is open to question.

### Where Japan Excels

#### Higher Education Is Placed Within Reach Of All

Some things they do better in Japan. One is public education. There the best education is given by the public authorities. The son of the rich man and the son of the poor man mingle. Who gains most by the contact you can figure out for yourself. University fees amount to £12 a year. That places higher education within the range of all. The Japanese workman beats his English competitor with something besides low wages. Education may be "the something."—London Daily Herald.

No one knows the age limits of turtle or tortoises.

### Competition For British

#### Japanese Merchants Make Flags And Medals For Coronation

Japanese merchants in the Far East are preparing for the King's coronation next year, and are seeking orders for flags, bunting, medals and picture postcards to be sold in the empire markets.

British traders who believe that only British-made Union Jacks should be hoisted in a British colony find that quotations from English manufacturers are much higher than the prices offered by Japanese dealers.

Less than 1 per cent. of the children in the elementary schools of London are poorly fed.

### Vimy Memorial

#### Million Dollar Edifice Designed By Canadian Artist

The great white expanse of the memorial, with its twin pylons rearing 138 feet into the sky, was designed by Walter Allward, Canadian sculptor-artist, who sketched it in two minutes on the back of an envelope 14 years ago and brought it to completion with the aid of thousands of skilled artisans.

Huge blocks of stone, on which are enrolled the names of 11,000 Canadian soldiers still listed as "missing," were brought from the ancient quarry of Spalato, Yugoslavia, where the Roman emperor Diocletian obtained materials for building his palaces in 300 A.D.

The main figure of the memorial is an allegorical group depicting "Canada mourning her dead," while other figures representing Truth, Justice, Knowledge, Peace and the Spirit of Sacrifice stand guard over the sleeping warriors buried in the surrounding battle fields of 20 years ago.

### SELECTED RECIPES

#### BRAN MUFFINS

Makes 1½ dozen Muffins

½ cup butter  
½ cup sugar  
2 tablespoons molasses  
2 eggs  
1 cup milk  
2 cups Quaker flour  
4 teaspoons baking powder  
½ tablespoon salt  
2½ cups Quaker Natural Bran  
1 cup raisins.

Method—Cream the butter; add sugar. Cream thoroughly together. Beat eggs; add molasses and milk. Add to butter and sugar mixture. Add bran and raisins, then flour, baking powder and salt, sifted together. Bake in well-greased muffin pans in hotoven about 425 degrees F. Reduce to 375 degrees F. after 10 minutes.

#### Fixing His Age

Visitor: "How old are you, sonny?"  
Boston Boy: "That's hard to say, Sir. According to my latest school tests, I have a psychological age of 11 and a moral age of 10. Anatomically, I'm 7; mentally, I'm 9. But I suppose you refer to my chronological age. That's 8—but nobody pays any attention to that these days!"

The United States produces 90 per cent. of the world's finished silk goods.

## Debt Adjustment

### Statement By T. C. Davis, Attorney-General, Saskatchewan

A pamphlet relative to debt adjustment and the disposal of the 1936 crop of Saskatchewan has been published by the Government. The following statement relative thereto has been issued by Hon. T. C. Davis, Attorney-General:

The Debt Adjustment Board of the Province of Saskatchewan maintains an office in each Judicial Centre of each Judicial District. Representatives of the board are, therefore, available in every district in the province.

If any person desires to make application for debt adjustment or requires the services of the Board or any of its officials, facilities of which are free, such services will be furnished upon request directed to the Board by letter or otherwise, either to its head office in Regina or to its representative in the district.

The government believes that the sooner business conditions generally get back to normal the better it will be for all and, having this objective in view, it earnestly desires to exert every effort within its power to assist all who are in distress to return to a self-supporting basis as quickly as possible.

#### Disposal Of 1936 Crop

It is the desire of the government of Saskatchewan, therefore, that, from the proceeds of the 1936 crop, there should be paid first, the expenses in connection with harvesting the same; second, seed grain advances in respect to the 1936 crop; then, the farmer should provide for the maintenance of himself and his family until next harvest; thereafter, he should provide for feed requirements and for seed and seeding operations until next harvest. After he has done this, he should improve his own credit to the fullest possible extent by taking care of his obligations.

#### Law With Respect To Disposal Of The 1936 Crop

The law of the province provides that, notwithstanding the terms of any agreement for sale or any mortgage or any lease entered into based upon an agreement for sale or mortgage, the farmer is obliged to deliver only a one-third share of the crop, from which share he is entitled to pay one year's taxes. This restriction does not apply to leases where one person owns land and leases it to another, either for a cash rental or upon a share of crop basis. This last mentioned type of share of crop lease is governed by the provisions of The Crop Payments Act.

#### General Powers Of The Board

If any person in the province desires any additional relief other than that already provided for by the law above referred to, such person should apply to the nearest representative of the Debt Adjustment Board stating the circumstances surrounding his case and the relief he desires to obtain. The Board will deal with every case upon its merits.

The government appreciates the fact that crop conditions in the Province of Saskatchewan this year are far from favourable; in large sections there will be no crop at all; in other sections there will be a very limited crop; in many sections of course crop conditions will be normal.

Conditions of this character are sure to produce many difficulties and the Government urgently desires to establish security against hardship in every case requiring such assistance.

Last year a statement respecting the disposition of the 1935 crop was issued on behalf the government. Once again this year, a similar statement is being issued copies of which are available at the office of every municipal secretary in Saskatchewan, the office of each representative of the Debt Adjustment Board in every Judicial Centre. In Local Improvement Districts copies may be secured from officials of the Department of Municipal Affairs. They may be obtained also from representatives of the Department of Agriculture, or from any department of the government.

The government requests that all parties concerned secure copies of this circular and urges all persons who may be in doubt with respect to any matter whatsoever relating to debt adjustment, disposal of the crop, etc., to get into contact immediately with representatives of the Board. The service is free and in necessary cases representatives of the Board will be sent to the individual farmer for the purpose of discussing his problems with them.—T. C. Davis, Attorney-General.

## 2 EXTRA CORD PLIES Under the Tread

ONLY Firestone gives you all the extra features of Two Extra Cord Plies under the tread, Gum-Dipped safety locked Cords and Safety Tread with the new extra rider strip. Together these give you 25% longer non-skid mileage life At No Extra Cost. Replace thin, worn tires now. See your nearest Firestone Dealer today.

### Finds Dead Volcano

#### Manitoba Man Happens Across Extinct Volcano Cone

Manitoba has an extinct volcano cone. The discovery was made by Harry N. Hawes, Dauphin prospector, who produced samples of volcanic lava and lime carbonate deposits to back up his discovery.

The extinct crater was found in the Boggy Creek district north of Roblin, within the borders of Duck Mountain forest reserve and 210 miles northwest of Winnipeg. Five distinct streams were traced from the cone to form a lava bed many feet deep. Close by was found a mineral hot spring.

Raised edges of the now inverted cone were said to be a quarter of a mile in diameter and 200 feet deep.

### Amazing Young Linguist

#### Child Prodigy Startles Her State With Her Vocabulary

If it is true, as the linguists say, that you can get along nicely with a vocabulary of 500 words, Carol Lynn Rowe, 2½ years old, should have no trouble.

Already, the child prodigy of Creston, Iowa, who at 20 months amazed her state with a vocabulary of 600 words, has a thorough knowledge and use of 2,000 words, and the list is increasing every day.

So rapid has been her progress with the English language that she is already learning a little German, and French, Italian and Spanish are to be taken up later.

#### A Qualified Nurse

Princess Arthur of Connaught is the only fully qualified nurse in the Royal Family. Brought up very quietly, Princess Arthur developed a mind of her own after marriage. She is said to have thrown into the sea on her honeymoon voyage—with her bridegroom's consent—about 40 black velvet hats that had been chosen for her by sedate relatives, states the News of the World.

Their competition is plenty stiff now, but as recently as 1868 there wasn't a single industrial company in the Japanese empire, nor an electric wire, an insurance policy, a bank building or a printing press. 2161

**ITCH**  
... STOPPED IN A MINUTE ...  
Are you tormented with the itching tortures of eczema, rashes, athlete's foot, eruptions, or other skin afflictions? For quick and happy relief use cooling, antiseptic, liquid D. D. D. Prescription. Its gentle oils soothe the irritated skin. Clear, greaseless and stainless—dries fast. Stops the most intense itching instantly. A 35c trial bottle, at drug stores proves it—or money back.

Warehouses at Calgary, Edmonton, Regina and Winnipeg

## Complete Destruction Of Canada's Spruce Timber Threatened By Insect Pest

Complete destruction within a quarter century of Canada's spruce timber supply is threatened by a rapidly-spreading outbreak of foreign insect pests, it was disclosed. Loss which governmental and other agencies are seeking to prevent will be at least \$10,500,000,000 if their efforts fail.

The European spruce sawfly, introduced accidentally to this country and first noticed in 1930, is known to have spread from Gaspe peninsula east to Nova Scotia and west at least as far as Temiskaming, Que., leaving 6,000 square miles of dead timber in Gaspe.

Between Gaspe and Temiskaming lies a vast area of forest in which the foliage-eating fly may have established itself without being observed. Governments and private enterprise have 1,400 men in the area looking for its presence.

The sawfly, in appearance about half-way between a small bee and a house-fly, lays eggs in the needles of spruce trees. The eggs hatch, a small green caterpillar emerges and eats the needles. The caterpillar grows rapidly, eats until the autumn, then falls to the ground and makes a cocoon.

The cocoon may be eaten by a shrew or mouse, but not enough of these little mammals exist to eat them all. Under favorable circumstances the insects multiply with great rapidity.

The department of agriculture is striving to introduce effective parasites to control the sawfly, breeding them in its laboratory at Belleville, Ont., and seeking to establish them in the forest where they will prey on the caterpillars and cocoons.

Officials recall the larch sawfly, a somewhat similar insect, destroyed all mature larch in this country in about 20 years, beginning in 1890. Parasites introduced to check their ravages were unable to cope with them at the time, but as the larch was destroyed the flies died of starvation and the parasites gained numerically, eventually effecting an apparent balance.

The larch started to come back as second growth and is still coming back, although it has not reached a commercial stage and is only a secondary commercial timber.

Danger in the spruce fly, however, is far more serious, it is claimed. Spruce is one of the nation's most valuable timbers and the best source of newsprint.

### For Better Markets

**Sir Edward Beatty Opposed To Over-Production Of Farm Products**

Opposition to agricultural over-production, belief better markets would be available for farm products, particularly Canadian wheat, and support of private competition as a stimulus to efficiency was voiced by Sir Edward Beatty, president of the Canadian Pacific Railway.

Sir Edward spoke at a special convention of the University of New Brunswick, held in conjunction with the annual convention of the Canadian Society of Technical agriculturists. He was tendered the honorary degree of doctor of laws.

Sir Edward also voiced opposition to "a belief that people must accept a permanent tendency to increasing direction of men's life by the state." Necessary private endeavor through competition had a stimulus to efficiency, he declared.

"We are going through a phase of public extravagance which never would have occurred had people realized public authorities have no money except by direct or indirect taxation," the railway head declared.

### Yield To Superstition

The council of Wombwell, Yorkshire, England, has yielded to superstition and abolished No. 13 from houses on its estates. This has been done on the advice of the rent collectors, who could not get tenants for No. 13 dwellings. One woman tenant said she had bad luck for six years. She herself changed the number to 11A—and next day her husband won \$40 in a football contest.

### Can Prevent Criminals

**Should Start With Child Training Says Famous Doctor**

A man who says he can recognize in a few minutes the type of person who is likely to commit crime, whether it be murder, robbery or suicide, and who claims he can cure that person of his criminal tendencies, has arrived in London, England, to give a series of lectures.

He is Dr. Alfred Adler, psychologist, one of the famous Viennese trio—Freud, Jung and Adler.

"I know I can pick out criminals," he said, "and if I, an individual, can cure them, why should not the world organize and cure all criminals? From the beginning of mankind the world has never attempted to cure crime, but has only punished it. Now I believe that if we organized properly we could rid the world of virtually all crime."

The start must be made with the child, and the time will come when all school teachers will be trained psychologists, Dr. Adler believes.

"It is easy to pick out the child who is going to develop into a potential criminal, or suicide, or drunkard," he declared. "It is always the child who has no social interest, who shuts himself up in himself, and who develops imaginary grievances. He becomes the 'getting' type, and when he grows older what he can't get he takes. A trained psychologist can put him right when he is a child. I myself have done it many times."

### Word Growing Obsolete

**"Gotten" Seldom Seen Although One Writer Uses It**

The following by J. C. Kirkwood, appeared recently in Marketing:

"Oh, Mr. Kirkwood!" was written in red over a cutting taken from this page of mine. What upset my correspondent was the word "gotten"—in the sentence, "One thing which presentations gotten out in the de luxe style . . ." The word "gotten" was underlined and a red arrow pointed to it—the double marking showing how seriously I had upset at least one stickler for purity of language. Alarmed, I consulted the Oxford dictionary, and found that gotten is "archaic," and since I myself am becoming archaic, I felt justified that I was running true to form. Then I looked up another book—a school text book which I used in the 80's of the Victorian era, and found these comforting words: "'Gotten', some grammarians say, is growing obsolete. If we say eaten, written, striven, forgotten, why not say gotten where this form of the participle is more euphonious as it often is than got?" "Obsolete!" That's the fate of humans as well as of words. I go to the scrap heap with my head up!"

### Grows Prize Roses

**This Nonagenarian Won't Stop Golf To Aid Gardening**

Nothing quite so good as an old dead cat to make roses grow, says W. F. Salisbury, 90, of Victoria, B.C., who for half a century has been carrying off prizes with his blooms.

As a further aid to good gardening, this hearty nonagenarian would "put a stop to all this bridge and golf playing."

Asked for a few tips on rose culture, Mr. Salisbury declared that, while many people insisted clay was the best soil, he had found these flowers would flourish anywhere, provided they had good drainage and wise care.

He himself digs his beds down 42 inches and then fills the trench with at least a foot of sods, leaves or other vegetable cuttings of a type which will rot readily. On this he puts three inches of earth and then a deep layer of barnyard manure. He tosses in all the kitchen bones he can find, replaces the earth and then patiently but confidently waits for the blooms to burgeon forth to prize-winning proportions.

China now has only 200 movie theatres. 2161

### Disease Resistance In Plants

**Definite Progress Being Made In Developing Plants Immune To Disease**

Disease resistance in plants offers to Canadian farmers great possibilities towards reducing the loss and inconvenience due to destructive plant diseases; nor is this interesting subject of recent origin, for one authority in 1884 states that improvement in the quality of potatoes with respect to disease resistance might be accomplished by a process of plant breeding.

By disease resistance is meant the ability of plants to resist attacks of disease producing organisms such as fungi and bacteria. This quality may be complete, partial or absent. Complete resistance implies true immunity as illustrated in the case of Irish Cobbler and Green Mountain potatoes which are immune to the disease known as wart or canker. Partial resistance is illustrated by the ability of certain varieties of potatoes to produce leaves and stems resistant to blight while the tubers may be extremely susceptible to this disease. Still more striking is the case of the Katahdin potato variety known to be immune to mild mosaic yet it may contract other forms of mosaic as well as leaf roll and spindle tuber.

Apparent immunity, or an escape from disease, may be confused with what is termed true immunity, for plants may avoid infection because of factors related to climate or seasonal conditions unfavorable to the parasite. For instance, in certain sections of Eastern Canada, particularly in Prince Edward Island, wheat frequently escapes the ravages of rust simply because the crop is harvested before the occurrence of conditions necessary for rust development.

Farmers and gardeners will learn with great satisfaction that definite progress has been made in the production of a number of economic crop plants resistant to important diseases. One cannot refer to this matter without mentioning the recent advances towards securing wheat varieties resistant to rust, an accomplishment credited to the personnel of the Rust Research Laboratory in Winnipeg, Manitoba. Further advances have been made in securing turnip varieties resistant to club root, as demonstrated by recent tests revealing that certain strains of the Wilhelmsburger variety may be grown with safety in land contaminated with the club root organism.

### The Cause Of Sunburn

Sunburn is not caused by the heat of the sun but by its actinic rays. Some of the worst cases of such burns on record, in which the skin of the face has peeled off before nightfall, have occurred on high mountains in the Arctic when the air was so cold that it froze the victim's cheeks.

In a theatrical magazine a crooner advertises that he is at liberty. This just goes to show what a tolerant people we are.

## Experimental Flights Over Atlantic Skyway Between Canada and United Kingdom

### Making Burglary Hard

**Contact With Secret Ray Eliminates Room And Ring Bells**

If the secret ray invented by Charles Alexander is all he claims it to be, Burglar "Bill" is right out of a job.

For two years Alexander has experimented in his laboratory at his home in Iwer, Buckinghamshire, England, testing, searching for the mystery ray.

The completed invention is a secret ray which not only gives warning as soon as the intruder gets into the building, but floods the room with light and locks all the doors.

All a householder or bank watchman has to do is to ring up the police and ask them to come along and collect.

The ray will also open doors, switch on light, ring bells and soon will take photographs. No one can see it or feel it, but as soon as a human body comes near it, it begins to act.

A visit to the inventor's office above Whitehall is something approaching a nightmare. Bells ring, colored light flash and pretty pictures appear in mirrors.

Walk casually over to the safe in the corner, and as you approach it a warning bell jangles and an innocent-looking mirror suddenly lights up to show a picture of a burglar robbing a safe.

Alexander is quite proud about the whole business.

"I bought a patent which contained the germ of the idea a couple of years ago," he declared.

"The rest of the time I have spent in countless experiments trying to perfect it."

"My apparatus gives off an invisible ray, which can flood a whole room. As soon as a human body comes in contact with it, it acts as a conductor."

### Indians Real Salesmen

**Sold Staten Island To The Dutch Six Times**

The Indians who sold Manhattan Island to Peter Minuit in 1626 for some firewater and \$24 worth of trinkets were smart boys. They did not own it. They were Canaries, Montauks and Rockaways from Long Island—just in town for a visit. So Peter had to buy it again from a tribe "uptown." The real salesmen, however, were the Raritanas, who sold Staten Island to the Dutch six successive times. Collier's.

The 26 acres of glass roofing in the Crystal Palace, London's famous place of amusement, contain more than 100,000 panes.

James Whitehead Riley at one time used the pseudonym of Benjamin F. Johnson.

Return of Hon. C. D. Howe, minister of transport, from an inspection trip of the trans-Canada airway called attention to pending experimental flights over the Atlantic skyway between Canada and the United Kingdom.

First of the giant British "composite" amphibian monoplanes that will make a test flight of the trans-ocean route this summer has already left the factory and survey flights are expected to begin soon.

Work on the trans-Canada airway is still in progress. Fields unfinished July 1 when the government closed the unemployment relief camps which had been in operation four years are being completed on a contract basis. There remains work of installing lights at many points and establishment of a radio beacon service for night and fog flying.

It is considered doubtful if the trans-Canada airway will be opened for commercial service much in advance of the Atlantic route, probably not before 1938.

It is believed two services will be inaugurated over the Atlantic within two years; a northern one in summer touching Newfoundland and having a Canadian terminus and a southern one in winter via the Azores and Bermuda to New York.

Imperial and Pan-American Airways are believed to have reached an agreement among themselves and with the British, Canadian, Newfoundland, Irish and United States governments to fly the services jointly, but no detail has been made public.

It is believed the Atlantic service will be operated cautiously at first and that planes will carry only mail and express as was done on the San Francisco-Manila route flown by Pan-American's clipper ships. When the service has a consistent record of good and safe performance, it is expected, passengers will be flown regularly, perhaps by 1939.

### Indifferent Farming

**Success Largely Depends Upon The Methods Used**

In parts of Saskatchewan where there has been reasonable moisture—many of them in the Regina area—one finds a good crop in the making on one side of the road and a poor crop on the other side. Or a good crop in prospect on one farm and a poor, uneven, weedy growth on an adjoining property.

What is the cause of these differences found within one neighborhood? It may be that in one case the land is better than in the other; such things are possible. It may be that one piece of land got an extra shower of rain that a neighboring section missed.

But the real point in most cases is that one piece of land has been farmed better than the other. It has received treatment that has made the crop come along faster, has guarded it against weeds, has put the proper nutriment into the soil. This is what is generally referred to as good farming, which is something that springs from the human element concerned. There is a lot of bad farming in Canada. Regina Leader-Post.

### Inch Measure Inadequate

**Some Parts Of Australia Get Rain By The Yard**

Inches are inadequate in measuring recent rainfall in Northern Queensland, Australia. Tully reports seven feet of rain in 10 weeks. Innisfail and Babinda had more than six feet, and they were run close by several other towns. Mackay could report only a yard and a half, but its total rainfall, if up to the average, should measure enough to float a battleship.

### Dome Regilded

The great dome of the Invalides in Paris, beneath which Napoleon lies buried, has been regilded. Gold leaf, thinner than cigarette paper, was applied over a surface equivalent to nearly half an acre, and 253,000 gold leaves were used.

## Colorful Cutwork Charms The Eye

Household Arts by Alice Brooks

Floral Design Also Includes a Bit of Stitchery

### PATTERN 5606

Aren't they life-like, these tulips and lilacs? You'll find them even more so when you've completed the last simple stitch of their colorful embroidery. First, you do a bit of easy cutwork, that of the tulips. Then a few sprays of delicate lilacs are quickly added in lazy daisy and French knots, for a combination motif that's as lovely for scarf or cloth as for doilies and matching centrepiece. In pattern 5606 you will find two and two reverse motifs 6 x 8 inches, two and two reverse motifs 4 1/2 x 6 inches and four motifs 2 1/4 x 2 1/4 inches; material requirements; illustrations of all stitches needed; color suggestions.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

### Alberta Crop Report.

From Alberta Department of Agriculture.

EDMONTON, August 14, 1936. —Harvest is general in southern and central districts and wheat cutting has commenced in northern areas and the Peace River district.

In the southern and east-central portions of the Province, no material change has occurred in the general crop situation. Conditions have continued to be extremely dry, the feed shortage becoming more acute as the season advances. Wheat yields in the dry area vary widely. The crop is a total failure in the more distressed districts, but yields of from 5 to 15 bushels are reported from many points, especially in the more western sections. Coarse grain yields in the south will be exceedingly low and many fields have already been cut for green feed. Shortage of water is reported in the southern irrigation districts and even crops under irrigation have suffered to some small extent.

From the Olds district north to the Edmonton zone, crops have had some benefit from scattered showers and on the whole are somewhat more promising than formerly anticipated. As this report goes to press rain is general in the Edmonton district and good showers are reported south to Calgary. Yields throughout this territory will range from light to average, both for wheat and coarse grains, depending upon prevalence of showers of the past month. Severe hail damage was recently suffered in the Olds-Didsbury area, also from Lacombe west to Rimbey, with lesser damage reported at other scattered points.

Conditions in the Peace River District continue to be very favourable. Harvesting of a good average crop is just nicely getting under way.

Federal-Provincial conferences have been in progress during the past ten days relative to the stock and feed situation in the drought areas of the Province.

Summary of reports from correspondents:

Medicine Hat: No rain since last report, wheat average under 5 bus. Feed situation serious.

Lethbridge: Harvest well advanced, dry land yields exceedingly light hay crop and grain under irrigation appreciably reduced.

Vulcan: Cutting general, fields patchy and wheat from 3 to 10 bushels, saving straw for fodder, serious feed shortage.

Brooks: Irrigation grain crops good but hay light. Good seed pea crop.

Calgary: Wheat on Summerfall low up to 10 bushels, some higher. Coarse grains being cut for feed. Shortage of water for livestock. Feed supplies low.

Youngstown: Hailstorm on 8th damaged the little crop there was. Very little feed.

Stettler: Wheat yielding 5 to 10 bushels on stubble, 10 to 20 on fallow, coarse grains poor, some sawfly damage.

Olds: Moisture conditions improved but hail damage severe south to Didsbury and east to Drumheller. Wheat harvest well under way.

Red Deer: Wheat cutting general, average 11 bushels, coarse

## Items of Interest

Motorists and others in Ontario are urging that the highways department take steps to limit the size of trucks used on the highways. If they are built much larger the big transport trucks will be as large as freight cars. They are a nuisance and a danger and should not be allowed on the highways.

Canadian Pacific and Canadian National railways have agreed to one-third reductions in freight rates on cattle and feed measure to farmers and ranchers in the drought-stricken sections southern Alberta. It was announced last week by Hon. W. N. Chant, provincial minister of agriculture.

Special session of the Edmonton City Council Saturday authorised Mayor Joseph A. Clarke and City Clerk Alfred Russell to combat an interim injunction, which restrains the city from accepting or undertaking to accept Prosperity Certificates. The injunction was granted in Alberta Supreme Court by Mr. Justice T. M. Tweedie to Ronald H. Watson, Edmonton mining engineer.

Settling a point which has been the subject of debate and some misunderstanding since the sales tax or ultimate purchasers Act was put into effect, the government had passed an order-in-council that provides for payment by tourists, of the sales tax on purchases made.

Trade between Alberta and the co-operative wholesale societies of Great Britain will be the subject of conferences to be held in the near future, it was learned by The Albertan on Sunday. The co-operatives, which have consumer members, numbering 10,000,000, are among the world's largest purchasers of primary products. It was believed the Alberta government would discuss business with representatives of the co-operatives on the basis of trading Alberta wheat and other products for manufactured goods from the shops of the co-operatives.

## Welcome First Train

The cowcatcher of old Engine 371 makes a fitting platform for these costumes of the 80's adorning belles of 1886 who took part in the pageant at Port Moody, July 3, celebrating the fiftieth anniversary of the first C. P. R. train from Montreal to the Pacific. The old engine, driven by the original engineer, hauled into Port Moody a string of six old-style wooden cars handled by the original conductor of the first train in a colorful re-enactment of the event. More than 6000 visitors, including scores of rail veterans in service in '86, flocked to Port Moody for the celebration.

**Doings of Our Neighbors**

**AT INNISFAIR:** Funeral services for Gwynedd Margaret, age 7 years, oldest daughter of Mr. and Mrs. Dave Lewellyn, were held from the Presbyterian church here last Wednesday afternoon. The previous Friday, while she was playing hobby horse at her home, she tripped and fell, the stick penetrating her abdomen and puncturing her bowel. She was taken to the Innisfail hospital and passed away the following Monday morning.

Work of remodelling of the Canadian Bank of Commerce building is expected to start this week and will be rushed to completion.

Sergeant T. A. Jensen, of Innisfail, Alberta, rated as one of Canada's most consistent snipers, Thursday outshot more than 150 crack marksmen to win the president's match at the annual meeting of the Ontario Rifle Association at the ranges in suburban Toronto.

**AT OLDS:** The newly organized fire brigade had their first call last week when smoke and flames were reported inside the grand stand at the agricultural grounds. When the brigade arrived at the scene they found that two young boys had lit the fire to roast some bologna.

The Calgary-Edmonton highway and the Olds streets are on a par—full of holes and worse than the old dirt roads of forty years ago.  
—Olds Gazette.

**AT CARSTAIRS:** About a hundred registered for the dividends on Monday in this polling division, while quite a number took the forms home to study them before signing.  
—Carstairs News

The Rosebud Municipal District is advertising a tax sale under the Tax Recovery Act to be held on September 12. Seven parcels of land will be offered for sale.

**SOCIAL CREDIT NOTES**

The Didsbury S.C. Group No. 1 held its regular meeting at the home of Mr. and Mrs. Lawrence Dickau on Thursday, August 18. After correspondence was read, points of the new Constitution and other important matters were discussed. One new member was registered. Lunch was then served by the ladies and a very interesting conversation brought the meeting to a close. The next meeting will be held at the home of Mr. and Mrs. Fred Hughes on Monday, August 31.  
—Contributed

The Didsbury Pioneer S.C. Group held its last meeting at the home of Mrs. Mack. The main study was, "How to work the Prosperity Bonds to get the greatest benefit." Messrs. McDonald and Schwesinger visited the group and presented amendments to the League's Constitution, which were tabled until the next meeting. The next meeting will be held at the home of the President, Mr. M. Weber, next Monday evening, August 24th at 8 o'clock. All are welcome.

**BERGEN—NICHE VALLEY**

Mr. and Mrs. P. A. Blain are taking as vacation a trip west of Sundre.

Ferril Gamble has returned to Edmonton after visiting her parents and friends for two weeks.

Rev. Oscar Snyder had a shingling bee on Tuesday, so as to get the church near completion.

The Social Crediters swarmed last Monday to register themselves for or against the government.

The crops around Bergen look flourishing in spite of the dry weather.

Ed. Shaeffer and John Shartner Jr. have finished sawing lumber with Harvey Burgess.

Lumber sales have almost ceased since the hail in the Didsbury district.

Bergen has had a few good showers in the last few weeks.

Grain cutting has not yet begun around here, but the wheat is ripening and well filled.

**Burnside Notes.**

Lone Pine W.I. met at the home of Mrs. Bruce Sheila on Thursday last, with a large attendance of members and visitors. Mrs. Cecil Cipperley gave a splendid paper on "Agriculture." Mrs. C. R. Liesemer, who attended Farm Women's Week at Olds, reported that she had enjoyed it very much and thanked the members for sending her. The Secretary, Miss Gertie McLean resigned, as she is leaving for Didsbury to attend school. Mrs. Melvin Liesemer was appointed secretary for the balance of the year. Mrs. Bert Pross was awarded 1st prize for a table bouquet. The September meeting will be held at the home of Mrs. J. Garner.

Mrs. Wall and daughter Nettie, who had been spending a couple of weeks at their old home at Loyalist, returned Monday evening.

Lewis Spraggs left on Friday for Hythe, Alberta, where he will join his brothers Pat and Bob.

Mr. and Mrs. Lewis McCulloch, of Turner Valley, spent Saturday and Sunday with relatives in the district.

Harold Sheils has gone to Lethbridge, where he has taken a position with the McCoy travelling outfit.

Mrs. Ted Bolton, of Westerdale, has been spending a few days with her parents, Mr. and Mrs. Pross.

Fred Metz is working on Mr. Claude Shields' combine.

Clarence Malloch is staying with Mr. Sam McAllister.

Mr. Arthur Davis, of Three Hills, is drilling a well for Mr. Geo. Metz.

We have Men's good quality Rider Pants from \$1.45 up.—T. E. Scott

**Nobody Reads the Paper—Is That So?**

"Nobody reads the paper, so why advertise?" say some merchants. Yet advertising experts of national concerns, men who demand—and get results, yearly give a big share of their advertising appropriations to weekly papers.

"Nobody reads the paper," but let the editor misspell one name in an obscure item buried at the bottom of an inside page and 20 readers will 'kid' him about it before the paper has been out two hours.

"Nobody reads the paper." Then why do the local publicity hounds bedevil the editor for favorable notices? And why are politicians so eager for the support of the paper?

"Nobody reads the paper." Yet the delinquent subscriber squawks to high heaven when his subscription is stopped.

"Nobody reads the paper," yet if the editor gets the mumps, the linotype breaks down or anything else happens to delay the paper, the post office and the editor are swamped with calls from indignant subscribers.

"Nobody reads the paper." Then why in the name of common sense is a man so anxious to keep his misdeeds from being published?—Ex.

## WORLD HAPPENINGS BRIEFLY TOLD

Jewish newspapers have been ordered not to report anything about the activities of Jews on Olympic teams.

Exhibits from King Edward and the National Gallery were included in an exhibition of British art at Amsterdam.

The Duke of York was elected president of Christ's hospital recently, receiving the ancient "charge" of faithfulness and diligence which originated in 1557.

The Harvard University observatory reported recently two comets were visible to the naked eye in the evening sky. An observatory bulletin termed the phenomena "an extremely rare occurrence."

It has been announced that the Beit fellowship for scientific research, tenable at the Imperial College of Science for 1936-37, has been awarded to E. K. Woodford of the University of Alberta, Edmonton.

At the end of 1935 South Africa, whose white population has not yet touched the two million mark, had 212,767 motor cars and taxis. This is an increase of 15.29 per cent. on 1934, when the number was 184,555.

Drouth has played havoc with the fruit and vegetable crops in Ontario, Manitoba and, to a lesser extent, Quebec, the Dominion bureau of statistics announced in a monthly crop report.

J. A. W. Lemon, 62, one of the men who introduced polo to western Canada, is dead. He was born at Guelph, Ont., and came west when 16 years of age to join a financial firm with which he remained until his death.

Canadian railways are keeping step with mechanical developments such as trucks, busses and aeroplanes, Sir Edward Beatty, president of the Canadian Pacific Railways, said on his arrival at Saint John, N.B., on an inspection tour.

### Radio Helps Fishermen

Points Out Presence Of Shoals To British Trawlers

Radio is now helping to catch fish.

Masters of more than 1,000 British trawlers can detect the presence of shoals by watching a small luminous spot travel over a graduated scale. The instrument was primarily designed to provide continuous sounding, but fishermen have found it also indicates the presence of fish.

Fitted to the hull of the ship is a special device which projects short radio waves toward the bottom of the sea. When they strike the bottom they are reflected back to the ship and cause a moving spot of light to jump suddenly. This movement indicates the depth of the water at that instant.

If a shoal of fish is passing under the ship, a second movement of the light spot will indicate its presence and, what is extremely important its depth.

### Planning Girl Engine Crew

Russian Woman Engineer Selecting Members From Best Mechanics

Twenty-three-year-old Zinaida Troitskaya, Russia's first and only woman locomotive engineer, has announced that she intends to train an engine crew of women in the near future. "Since I am the only woman now working on a locomotive I have decided to select members for this brigade from the best girl mechanics," she added. The announcement was made just after she had been informed that the Government had awarded her the Order of Lenin, its highest honor, for exemplary work at the throttle of the Z-104, one of the Kazan's most powerful locomotives. Zinaida lives in Moscow. Her mother is a time-keeper in a locomotive depot, and her father was a railway clerk. At the time of his death she became apprenticed as a locomotive mechanic, then worked her way up as engineer.

### High Quality Coal In Arctic

An expedition prospecting mineral resources of the Pechora region, on the banks of the river Vorkuta, north of the Ural mountains and beyond the polar circle has discovered high quality coal deposits in thick layers.

## Advance In Television

Expected To Be Offered To The Public By Next Year

Television seems certain to come out of its hiding place this summer. A large-scale experimental broadcasting station is being constructed on top of the Empire State building in New York city, and official announcements from the Radio Corporation of America say that it will be ready for operation within a few months. R.C.A.'s chief rival, Farnsworth Television, whose system has been adopted for trial by the British and German governments and is now undergoing test constructions in those countries, is also showing great activity at its headquarters in Philadelphia. Both these systems employ the electrical-scanning principle, which practically renders obsolete all previous mechanical-scanning systems.

The Federal Communications Commission is now holding a series of hearings to establish uniform standards so that a given television receiving set will operate interchangeably on either an R.C.A. or Farnsworth sending signal. Unlike sound broadcasting, in television any change in procedure will render useless existing receiving sets, so that any setting up of standards immediately "freezes" development of both sending and receiving while the standards remain in force.

This is but one of the almost infinitely complicated technical problems that face television. Scientists agree that the development of television will be vastly slower than the development of sound broadcasting. So far, plans call for the distribution of only a limited number of receiving sets, to be given out by the television companies largely to their own staffs and used for experimental purposes.

Television possibly will be offered to the general public next year. The size of the image developed for home receiving sets thus far is ten by fourteen inches.—New Republic, New York.

## Wrigley's Inaugurate Pension Plan

Company Contributes Nearly \$100,000 To Start Plan For Employees

Over two hundred members of the Wm. Wrigley Jr. Co. Limited of Canada join with 3,000 employees of the company in the United States in a pension plan recently announced. The plan went into effect in Canada on July 1st, 1936.

Under the plan the amount of pensions depends on the workers' wages and the length of service with the Wrigley Company. Wrigley's have always been intensely interested in the welfare and security of their employees and have always manifested this interest to the fullest extent.

In order to credit employees who have been with the company for many years before the start of the plan, Wrigley's have made a cash contribution to the fund of almost \$100,000 to cover these years of previous service. Thus any employee who has been with the Wrigley Company for 25 years and whose salary is now \$200 a month, would have an automatic pension of \$50.00 per month.

On the average, the company and the employees pay into the fund an equal amount each month. The employees' contribution amounts to about four cents on every dollar earned. The retirement age is set at 65 years. Life expectancy is estimated at 12 years above age 65. However in the event of death, or discontinuance in the employment of the Wrigley Company, or in the case of early retirement, employees may withdraw the funds which they have paid into the plan, plus interest compounded at 3% annually. Payments and pensions are all based on a percentage of wage multiplied by the number of years with the company.

As an example for employees long with the company, a man who has now been with Wrigley's for 25 years, earning a salary of \$200 monthly, would, if he continues with the company for twenty more years, earn a pension of \$110.00 per month. And if he lives out the normal expectancy of 12 years, he will have withdrawn a total of \$15,840.00, although his contributions would amount to only \$1,920.00.

That the Wrigley Company is acting in perfect good faith is evidenced by the tremendous amount of cash donated to the fund in order to ensure fair treatment to old employees. Fully aware of the moral responsibility of the employer to life long employees, Wrigley's have assumed this responsibility realizing that the welfare of the community is as important to corporations as it is to individuals.

The man who always says, "I run things at home," usually refers to the lawnmower, the mangle and the errands. 2161

## New War Weapon

Britain Has Devised Anti-Aircraft Gun With Eight Barrels

The British have devised an anti-aircraft gun, with eight barrels, which can fire 1,000 shells a minute four miles high. It throws explosive shells, incendiary shells, tracer bullets and shrapnel. With this, it is claimed, a barrage can be set up in the sky through which planes cannot pass. But there are many considerations. Shells must explode at the right height, they must explode in the right place, and it takes some moments for a shell to rise, the wind must be allowed for, and the plane is a moving object, which can rise higher, or drop lower, change direction at will, and is a difficult target to handle. The assurance in this case may rest on the fact of the gun being able to throw such a stream of shell into the air, that, altogether different from a few scattered shots, the plane is unable to judge which way to turn for escape, and falls a victim to the gunner. Whatever the success of this new arm, there is this to be said, that it is infinitely superior to the old anti-aircraft gun, and is an instrument of defence.—Halifax Chronicle.

## Goes To Italy

First U.S. Minister To Canada Selected To Go To Rome

William Phillips, United States under-secretary of state, has been selected as the new ambassador to Rome by his country. Mr. Phillips was the first United States minister to Canada.

Mr. Phillips will face two distinct problems in his new appointment, it is said in diplomatic circles. First, and most direct, is the course of Italo-American relations complicated by the inability of the United States to recognize the Italian conquest of Ethiopia. Considerable tension for some time to come is expected.

Of indirect, but far greater importance, it is said however, is the problem of analyzing Italy's probable future course of action, and keeping the United States fully informed. For remote as Italy may seem from the United States, what course she pursues in Europe has a vital effect on affairs in the Far East, where the United States is directly concerned.

## Civic Employment Bureau

South African City Supplies Native Help When Needed

The City of Johannesburg, South Africa, has announced that it can supply native washerwomen and janitresses to those who seek such help. At its Native Women's Hostel 120 native women now live and earn their living by doing laundry work or going to homes to do washing or housecleaning. To help them in their laundry enterprise the city has installed electric irons and a telephone.

## Looking Forward

Lecturer Thinks Houses And Towns Will Be Very Different

An extraordinary verbal picture of the house of the future was drawn recently by Mr. Humphrey A. Pakington, F.R.I., B.A., in the course of a lecture on the housing problem, organized by the Architectural Association, in London, England. As regarded internal planning said the lecturer, the private dining-room and the kitchen would disappear; and for the meals of the future packets of compressed health would be slid into the communal refectory on white topped tables. There would be no washing-up, for there would be nothing to wash in. The town of the future would be a manageable unit of ten thousand inhabitants, housed in twenty blocks, of three or four storeys in height. These blocks would be of a semi-permanent nature, easily replanned or removed to meet any needs. Each block would be a potted village of five hundred inhabitants, with its own health centre and co-operative stores.

## Will Be Well Guarded

South Africa Is Exhibiting Gems Worth Millions Of Dollars

Hidden detectives will guard precious stones worth millions of dollars at the Empire exhibition to be staged at Johannesburg, South Africa.

The stones will be displayed in the Hall of Jewels which is being converted from one wing of the Transvaal Chamber of Mines building.

In addition to detectives, concealed at vantage points, there will be alarms operated by photo-electric cells, as well as other ingenious devices designed to baffle thieves.

Another "safety factor" is the absence of any windows. Ventilation is provided artificially. Entrance to the chamber will be by turnstile, allowing "one-way traffic" only.

## Some Cities Show Increase

But Building Permits Lower Than Same Period Last Year

Value of building permits in 58 Canadian cities was more than 10 per cent. lower last June than in June, 1935, the Dominion bureau of statistics reported recently. The value was \$1,580,740, up \$114,902 from the previous week but \$524,115 below the level of June a year before.

The bureau said the value of the building authorized in the first six months of this year was \$17,500,420, considerably lower than the \$24,610,511 reported in the period January-June, 1935.

Among cities reporting improvement over May, 1936 and June, 1935, were: Regina, Saskatoon, Edmonton, Lethbridge, Nanaimo, New Westminster and North Vancouver.

## Railway Centenary

Celebrations In Montreal Mark 100 Years Of Operation

Canadian railways must keep step with mechanical developments like trucks, buses and aeroplanes or "become a gradually lessening influence in a field which for many years was peculiarly their own," Hon. C. D. Howe, minister of transport warned.

The transport minister joined with Premier Mackenzie King in congratulating the railways of Canada in completing 100 years of operations. Their messages were directed to celebrations in Montreal, marking the centenary of the first railway in Canada, which operated between La Prairie and St. Johns', Quebec.

On the occasion of the 100th anniversary of the establishment in Canada of transportation by rail, the prime minister's message read: "I desire to extend heartiest congratulations to the officials and men of the Canadian National Railways, within whose system is included the original line over which the first train in Canada made its journey, and my cordial greetings to all who are engaged in providing for the community safe and efficient railway service. During the century which has elapsed since the first train operated between La Prairie and St. Johns' the steam railway has played an essential and all important part both in the formation and in the development of our Dominion.

"I should like to avail myself of this centenary occasion to convey to the Canadian National and to the railways of Canada as a whole my best wishes for continued opportunities of national service and for their prosperity in the years that lie ahead."

The transport minister traced the development of railways in Canada from the 16 miles between La Prairie and St. Johns' now part of the Canadian National system, 100 years ago to 42,000 miles today.

## Speeding Up Photos

Mobile Darkroom Aids Scotland Yard Experts In Tracing Clews

Scotland Yard's expert cameramen, who nowadays take numerous photographs at the scene of every big crime in the Metropolitan area, are looking forward to the delivery shortly of their new mobile darkroom.

The introduction of this vehicle—literally a laboratory on wheels—promises a big saving of time in the early stages of crime detection.

At present photographers are rushed to the scene of a crime as quickly as possible, but their plates have to be brought back to Scotland Yard for developing. At times the pictures prove unsatisfactory and more have to be taken often when on-the-spot conditions have changed considerably.

Photographers using the new van, therefore, will not only save time, but also achieve better results.

In addition to the dark room, with its tanks and other developing apparatus, the van will also house a finger-print compartment, in which experts will be able to examine finger-prints as soon as they are found and determine without delay whether they are of value.

The vehicle is being given an extra strong chassis to fit it for travel over rough ground, while a special springing system will enable the photographic experts to work while the van is in motion.

## Germany's Latest Novelty

Glass Train Offers Passengers Good View Of Scenery

A "glass" train is the latest novelty for travellers on German railways. The upper part of the train is almost entirely of glass and offers passengers an uninterrupted view of the surrounding scenery. In the hilly and mountainous country the improvement is especially attractive. It will be put into regular service for special excursions from Munich to a different destination each day. The "Glass Train" is the third important break-away from conventional train design that German engineers have made recently—the other two being stream-lined locomotives and double-decker carriages.

One must speculate to accumulate, but it is difficult these days to accumulate enough to speculate.

## Take This Tip--Make A Smart Knit!

Household Arts by Alice Brooks

Your Wardrobe Needs This Smart Two-Piecer

PATTERN 5655

Take a timely tip now, and knit this blouse that you'll wear throughout the year! You'll love the lacy lace of that pointed yoke, so prettily set off by plain stockinette stitch, and are sure to adore the sleek, snug fit of ribbing cross the hips. Rib stitch also bands the simple sleeves. Knit it of pastel string, or yarn, in one of the vibrant and new Fall shades. In pattern 5655 you will find instructions for making the blouse and skirt in size 16-18 and 38-40; an illustration of the blouse and of all stitches used; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg.

There is no Alice Brooks pattern book published

**Iron the Easy Way**  
WITH THE **Coleman**  
SELF HEATING **IRON**

**Why You Should Have It**

1. Costs only 1/10 as much to use
2. Lights instantly
3. Heats in a few seconds
4. Quickly ready for use
5. Maintains even heat
6. Hotter at the point
7. Irons with less effort
8. Saves 1/2 ironing time
9. No fires to build
10. No ashes to carry

Now you can iron in coal comfort in any part of the house... even outdoors beneath a shade tree. The Coleman iron is self-heating. No cords nor connections. Carry & use it anywhere. Several models available at New Low Prices. Ask your dealer or write for free illustrated folder and details. The Coleman Lamp and Stove Co., Ltd. Dept. W2317 Toronto, Ont.

## Thou Shalt Not Love

— A NOVEL BY —  
GEORGIA GRAIG

CHAPTER II.—Continued

"They'll spoil their figures," Starr told herself, and knew she was laughing at herself, too. She was yearning for just such a meal. Starr Ellison—hungry!

She turned sharply when some one touched her arm, looked up to see a girl of about her own age standing timidly before her. But the girl was not well dressed as Starr was, with her carefully preserved tailleur. There had been a pitiful attempt to "look nice," Starr could see that, but how could any girl look nice in clothing that was frayed almost past the wearing point? And her cheeks were gaunt, pale beneath the spots of rouge.

"I—I hope you won't mind me—speaking to you, Miss," she said huskily. "But I've been looking for somebody— Oh, I can't stand it any longer—being so hungry. . . I've been looking and looking for a job, but—" Her voice broke. The pathetic girl did not need to explain to Starr that she was not a regular feminine panhandler.

The irony of it! But of course, Starr understood at once. She had forgotten, for the time being that to the casual observer she still looked like a girl used to ermines and orchids.

"I'm so sorry!" she said impetuously. "But you see, I can't—" The dying of hope in the girl's eyes, her painful confusion, were too much. "Wait a minute!" she said, as her gloved hands fumbled at her purse, a smart looking purse that she had picked up in Cairo on that last dreadful trip and was using now because it was the last one left. She took a quick inventory of its contents, and handed the girl a quarter. That would leave—she didn't dare count the thin wad of dollar bills. But they would keep her going for a night or two.

The girl was choking her thanks. "You won't be sorry," she said as she took the coin with trembling fingers. "And I hope you'll never know, Miss—"

Starr was not hearing her. She was hastily heading on down the cross street—toward the employment agencies. She dared not look back at the girl. That starving girl might be herself before long unless. . .

"There may be worse things in the world at that," she was murmuring, "than having only six months to live."

Yes, and there was a bit of comfort in the thought that there might be better things than having an opportunity to go back to Mrs. Mahoney's rooming house that night—even if she could—that unspeakably drab place. Would she ever forget, could she, how often she had sat on the edge of her narrow, rickety bed back there, staring at the faded wall paper, the bureau with the ragged-edged scarf that was never clean, the dingy, hopeless-looking marquisette curtains, and thought—of so much that she wanted to forget and could not?

Determinedly Starr marched on and turned down Sixth Avenue toward the agencies. What else could she do? That was all that life had resolved itself into in the past weeks, making the rounds of them day after day, or hoping, desperately, that the next day a job would materialize or

something happen to break her luck, the luck that had pursued her so long, now. The luck that had not been satisfied with taking her father from her, but finally had taken his last cent, too, until now his daughter—his doomed daughter!—was here alone in a strange town. She was trying to make a go of what was left of her own life, far from their friends in the home town where Starr had feared some of them might insist on helping her. That would have been the last straw. Charity!

It was the same old story, and the afternoon had almost slipped by, with Starr feeling that her feet must be all blisters, when she reached the place she always left to the last—the worst agency of them all. Even in her desperation she hesitated in the dingy doorway, staring at the dirty arrow that pointed her way upward to the place from which she cringed. But taking her courage in her hands, she climbed the steps and went into the dusty, half-lighted room where the same henna blonde woman, with apparently the same mascara and heavy rouge she had worn since the first day Starr had seen her, sat behind the cluttered desk. The woman glanced up at her and shook her head.

"Nothin'," she said wearily, and then her shoulders shrugged. "Fra'd you're wastin' your time and mine comin' here, dearie. We—"

"But there must be something—surely!" Starr burst out desperately. "I told you I was a good secretary—I am!—but I'll do anything. Anything!"

The woman's rouged lips were smiling oddly as she glanced up at the girl, that glance calculating, as if wondering just how much this well dressed girl, of so obviously a different type to those to whom she was accustomed, meant what she said. Starr's pale face was flushed, eager.

"Well, why'n't you say so, in the first place?" the woman asked, her tone a bit exasperated. "Here I been thinkin' maybe you was a little too nice for our jobs, dearie, and—"

"But I told you!" Starr cut in, and felt her body shiver at the calculating glance and the queer laugh of the agency woman. The latter lowered her voice to say:

"You're a swell lookin' skirt, at that, an' say, baby, I got just the job. . . Swell guy, but he's plenty particular the kind we send him— Oh, you know, I reckon. . . You'd have to be real sweet and nice to him, dearie, and—"

"Of course, I'd be nice!" Starr said breathlessly. "I never thought of being—"

The woman laughed again, her eyes crinkling in the rouged creases of her cheeks, then slowly drew toward her a card index box.

"The fee," she said, "will be a little steep, maybe, but y' understand, a girl don't get a chance at bein' nice to big shots that'll maybe plaster her with jewels, do they like her, see, and five iron men are cheap at the price, see? But you got to be nice. . ."

It was not so much the woman's words as her smirk. Suddenly Starr understood. She thought she was going to be sick. She didn't know what to say. But the five dollars answered the question for her.

"I—I haven't that much with me," she stammered. "I—I'll be back tomorrow."

"Okay, baby, an' you'll be gettin' a bargain."

Starr didn't know how she got out of the place, nor how far she had walked in an effort to get away from it until she saw the shrubbery of Central Park looming up ahead. She still felt nauseated. She, Starr Ellison, must have fallen pretty low. To be offered a job like that! She hadn't thought it possible. And yet—and yet. . . What difference did it make, after all, except that she still had pride enough to resent the thought that she looked like a girl who would even for a minute consider anything of that kind?

Still— What that agency woman had held out had offered her life, of a sort, and a chance to play. She hadn't thought of it in that light, though. She would not. Just before noon she had run across a man she felt sure, if she had given him the slightest chance, would have offered her a little chance to play. She had seen it in the eyes of that man before the Fifth Avenue show window. If she had waited just a minute more, the invitation would have been on his lips. But she had run away. Now she was offered, in-

## His Majesty's Portrait FREE

Copyright—Bassano

THE makers of Bee Hive Golden Corn Syrup and Durham Corn Starch are happy to offer to their friends throughout Canada a handsome two tone reproduction of His Majesty, King Edward VIII. The portrait, (by Bassano) is one of the most recent and has been specifically designed for framing, measuring approximately 9" by 11". It is restrained and dignified and when framed will blend in perfect taste with the furnishings of the finest room. Many well deserved compliments have been received on the beautiful appearance of this portrait.

Mail to the St. Lawrence Starch Co. Limited, Dept. 8, Port Credit, Ontario and your free portrait will be forwarded promptly.

K336

stead of a chance to play with a man of her own sort—

She shivered at the thought and hurried on through the lower edge of the Park. She had no desire right now to see people of leisure driving by in their rich limousines.

For the second time that day she found herself on Fifth Avenue, presently, but it was far to the north of the shopping district. The high stone wall of the Park was on one side of her, the trees shading the sidewalk just turning into rich autumnal shades. Across the street, loomed tall sky scrapers where people lived in twenty-room apartments. Shining cars sped by, arguing the right of way to the street with the top-heavy green busses. She walked on northward.

There was no scheme in Starr's mind, only the desire to keep on walking. Certainly there was nothing better to do, and the Avenue was a pleasant place; always interesting.

She had walked farther than she realized, and was almost opposite the Metropolitan Museum when she saw him.

There was no mistaking him, the bronzed good looks of the man who

had spoken to her that noon, the set of his dark head on his wide shoulders, and the careless almost disinterested way, certain of his own masterfulness, with which he drove his maroon roadster.

He saw her at almost the exact moment she saw him. There was surprise in his eyes the moment their eyes met over the heads of the scattered walkers and the cars between. Then he grinned, straight at her, and Starr caught her breath. He was slowing down! Stopping at the next corner! He would be coming back!

How queer people could be, she thought in a breath. There, just a moment before, she had been regretting having run away from him, and right this minute there was no other thought in her mind but of doing the same thing again. Just why, she had no idea. She only knew that she must. On that single thought she had whirled as quickly as the car was brought almost to a stop. She sped up the steps of the Museum and into the safety of its maze of rooms, with a grateful sight at recognition of the fact that it was a free visiting day and the chains were down.

She was wondering if he really

would come to seek her out as she wound her way through room after room, familiar with them all from many visits with her father. She smiled a little. Well, he would have a nice chase.

But Michael Fairbourne was doing no chasing. At the curb where he had pulled up for a moment, he sat still, glancing back. The girl was nowhere in sight. It did not occur to him she could have gone into the Museum. Nobody he had ever known ever had. His brow was wrinkled thoughtfully as he chewed on his lips for a moment, ruminatively. He took off his hat and ran his fingers through his thick hair.

"Um, that's funny. . . Almost like a hunch, but I'm not going chasing after her. . . If I see that girl just one more time, though, I'm going to take a shot in the dark. . . Just the type—just the type."

As his foot pressed the starter and his car shot ahead, he was grimacing.

"And if I do, here's hoping she's an orphan—complete!"

## LOCAL & GENERAL

Bill Ross reports that crops in the Cremona district are very good.

Community Hall service next Sunday at 7:45. Rev. A. Traub will be the speaker.

Mr. and Mrs. Pete Miquelon left for Wetaskiwin on their vacation trip on Tuesday.

Mr. and Mrs. George Julien are vacationing at Sylvan Lake this week.

Mr. and Mrs. Spence and Barbara returned Thursday after two weeks at Banff.

For real value in Work Shirts try one of our \$1.00 line.—T. E. Scott

Messrs. W. R. Hartley and Pete Booker spent an enjoyable vacation at Banff, returning Monday.

Mr. Joe MacDonald went to Calgary on Monday to take his barber examinations.

Mr. Orville Kirk, who has been vacationing at Banff for a couple of weeks, returned home on Saturday.

George Boorman has obtained a position as teacher at Andrews School, 14 miles west of Bentley.

Miss Edna Schonert, of Calgary, has been spending a few days with Rev. and Mrs. J. R. Geeson and family.

Mr. and Mrs. Ed. Ford and Mr. and Mrs. Lorne Frey, who have been vacationing at Banff National Park, returned home on Tuesday.

Frank Kaufman, Frank Heselton, Tom Wyman and Ward Wyman took in the big baseball tournament at Ponoka last Wednesday.

Mr. and Mrs. H. M. Reiber, Art, and Mr. and Mrs. Morrow, of Lethbridge, motored to Banff last Thursday for a few days' holiday in the National Park.

Mrs. Ratcliff and family, who had been visiting with her parents, Mr. and Mrs. M. B. Clemens, left on Sunday for her home at Kimberley, B.C.

Buy your Harvest Gloves from T. E. Scott and get the best.

Mr. and Mrs. J. A. McGhee returned Tuesday from Vancouver where they spent the last few days of their vacation. Jim is on the job at the depot again.

Margaret Adshead, daughter of Mr. and Mrs. C. H. Adshead, underwent an appendicitis operation on Tuesday evening. On last reports she is progressing favorably.

Frank Churchill, who had been employed at the Pioneer Garage, left on Saturday to take a position at Innisfail. O. Goodfellow of Acme will take his position at the garage.

Mrs. Devitt had the misfortune to sustain a fall and fracture her hip on Saturday. She was taken to the Didsbury Hospital and is reported to be in a serious condition. Mrs. Devitt is in her eightieth year.

Miss Verille Ryckman, a daughter of Mr. and Mrs. George Ryckman of Bellingham, Washington, is visiting her uncle and aunt, Mr. and Mrs. Allen Hunsperger and other relatives for a few weeks.

We have 15 pairs of Sisman's Scampers. Regular \$2.00 Line to clear at only \$1.50.—T. E. Scott.

The Gun Club held a successful shoot Friday night. It is expected that the boys will be out in greater numbers, getting ready for the Cup Competition which will be held early in September.

George Geiger and Alfred Brusso took a big slice of the prize money in the athletic events at the Olds Fair last week. Geiger took first and Brusso second place in 100 and 200 yards and won the half mile relay.

Associated with Mr. Gavin Spence for the past twelve years as piano tuner, Mr. W. H. Norton was found dead in bed Saturday morning August 8 as the result of a heart attack. He had reached the ripe age of 77 years, and having no living relatives was buried in the Trochu cemetery. His last living relation was Mme. Lillian Nordica, a cousin who changed her name from Norton for stage purposes.

## Melvin Notes.

Mr. and Mrs. Emil Krebs and children spent Sunday with Mr. and Mrs. John Kershaw.

Miss Laura Johnston visited her sister, Mrs. Hugh Morton, last week.

Mrs. George Youngs and son spent a few days last week with Miss Cora O'Brien.

Melvin seems to have had more than her fair share of hail when they received their second bad hail storm of the season.

Mr. and Mrs. Lawrence Chandler and family visited with Mr. and Mrs. Lloyd Chandler on Sunday.

We are pleased to hear that little Esther Schneidmiller is home after an operation at the Didsbury Hospital.

Mrs. Chas. Youngs and Dorothy spent a day with Mr. and Mrs. James French at Ennerdale and report good crops and gardens in that district.

We are glad to hear that Miss Audrey Hosegood of Rugby, who has been in the Calgary Hospital, is home and much improved. We all wish her a speedy recovery.

Lorne Hardy, son of Mr. and Mrs. Stanley Hardy, of Vancouver, who is spending his holidays with his grandmother, Mrs. W. Hardy, is spending a few days at the home of Mrs. Chas. Youngs and calling on other friends in the district. We are pleased to see Lorne, as his mother was a former Melvin teacher (Miss Ivy Simpson).

## Complete Turnover in Quebec Elections

Only 14 supporters of Premier Godbout were elected in the sweeping provincial contest ending the Liberals' 39-year regime in Quebec. Premier Godbout and most of his ministers were defeated. Maurice Duplessis, leader of the opposition in the former government, will lead the new government. The final standing was: Union Nationale 76 and Liberals 14.

Representatives of the prairie provinces are closeted today with Premier King and his ministers in an effort to devise a scheme to move the drought stricken herds of cattle to districts where feed is more plentiful, and to give relief to the settlers in the drought areas.

## WEEKLY SERMONETTE

If a wire carrying a heavy current of electricity were placed low enough and I reached up and touched it death would be swift as lightning's stroke. Yet the birds light on it and take no harm. The secret is, that when they touch this high powered wire they touch nothing else, so are safe. My danger would be that while I touched the wire I would also be touching the earth. God would have us seek our safety in complete surrender to His power and love. It is when we reach one hand up to God, while with the other we keep fast hold on some forbidden thing, that we are in danger.

Thanks.

## DIDSBURY OPERA HOUSE

This Friday-Saturday  
— Robert TAYLOR  
and Loretta YOUNG

## 'PRIVATE Number'

—She had her secrets . . . her husband's name . . . her baby . . . her hide-out from a world that conspired to rob her of everything that she loved in life!

## Next Wednesday

—The Fun is Fast and the Girls are Furious—

## 'SNOWED UNDER'

—Meet a man with three wives—his first wanted more matrimony, his second more alimony, and his would-be wife more hey-nony-nony! And just as they started to raise the roof a blizzard broke—and they were snowed under. This is a Warner Bros. 5 Star Final featuring Geo. Brent, Genevieve Tobin, Glenda Farrell, Patricia Ellis and Frank McHugh.

Friday-Saturday, August 28-29

## "Barbary Coast"

—ADDED—

**Louis vs. Schmelling**  
Greatest upset in ring history!
